ISO Microchip

- 134.2kHZ frequency
- Complies with ISO standards
- Encrypted with unique 15-digit microchip number
- Traceable through AAHA’s PetMicrochipLookup.org
- Smooth one-handed injection system
- Locks when chip is implanted, preventing the microchip from retracting into the syringe
- Individually packaged; each sealed microchip pouch is sterile for three years

**Dimensions**
- 0.524” x 0.083”
  (13.3 mm ±0.4 x 2.12 mm ±0.05)

**Weight**
- 0.004 ounces (0.114 grams)

**Operating Temperature**
- 13 °F to 158 °F (-25 °C to 70 °C)

**Storage Temperature**
- -40 °F to 194 °F (-40 °C to 90 °C)
  - 95% RH, non-condensing

**Power Supply**
- Passive, without battery

**Working Frequency**
- Total memory 512 bits

**Memory Capacity**
- 64 bits required for ISO Standard 11784

**Read Distance**
- Up to 11.81” (30 cm)

**Housing**
- Bio-compatible glass

**Packaging**
- Individually packaged; each sealed microchip pouch is sterile for three years
  - Six adhesive bar-coded labels with each syringe

**Standard Compliance**
- ISO 11784 & 11785

**Recommended Implantation Sites**
